### APPLICATION FOR INSTALLATION OF DEDUCT WATER METER FROM MANCHESTER WATER WORKS

DATE: \_\_\_\_\_ RESIDENTIAL \_\_\_\_\_ COMMERCIAL \_\_\_\_\_

OWNER'S NAME: \_\_\_\_\_

ADDRESS: \_\_\_\_\_

PHONE #: \_\_\_\_\_

**\$80.00** METER INSPECTION CHARGE PAID CHECK# \_\_\_\_\_ CASH \_\_\_\_\_

---

#### **AGREEMENT:**

I, (please print) \_\_\_\_\_, the owner of said property or duly authorized representative, guarantee access for unscheduled deduct water meter inspections by authorized agents of Manchester Water Works (MWW) and the Hooksett Sewer Commission (HSC).

Applicant pays for the meter and horn at MWW, picks up and installs horn and ARB wire. The outside termination of the ARB wire must be adjacent to the existing MWW ARB box. The applicant then notifies MWW (624-6494) that this work has been completed and set up an appointment for a representative from MWW to enter the building.

MWW installs the meter, wires the ARB box and inspects the installation. If the installation does not comply with MWW standards, the applicant is notified and a follow up visit is scheduled. The application will be billed for any follow up visits on a time, equipment and material basis.

ALL IRRIGATION SYSTEMS must have a MWW approved backflow prevention device located on the irrigation system side of the deduct meter. The backflow device must be accessible to MWW personnel for annual or semi-annual testing.

**PLEASE NOTE:** Deduct credits will not begin until the meter inspection is satisfactorily completed.
